

DEIR Pre-Release Informational Meeting May 13, 2020

History of Project Changes

Levi-Cushman Plan (Existing Zoning)

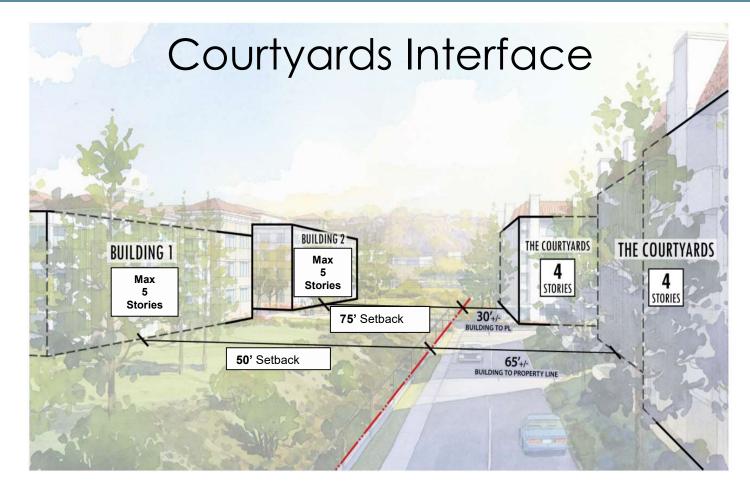

Plan #1 (1987)

- Equivalent of 9,000 Units
- Channelization of the River
- High-rise buildings

Changes for Neighbors

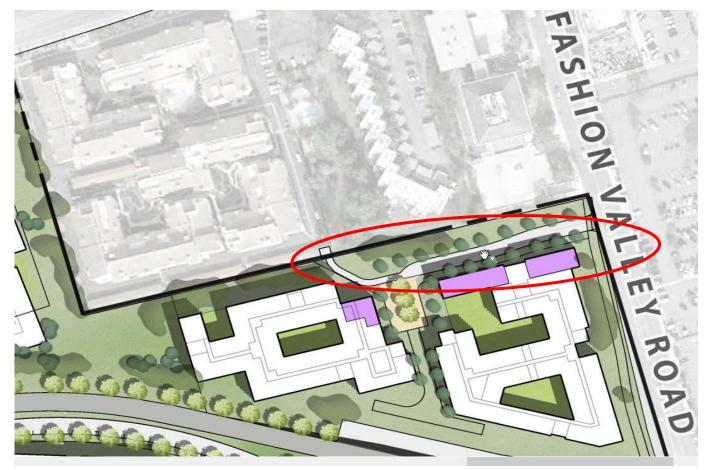

- Capped building heights at 5 stories
- Removed pedestrian connection
- Added stoplight at Goshen

Changes for Neighbors

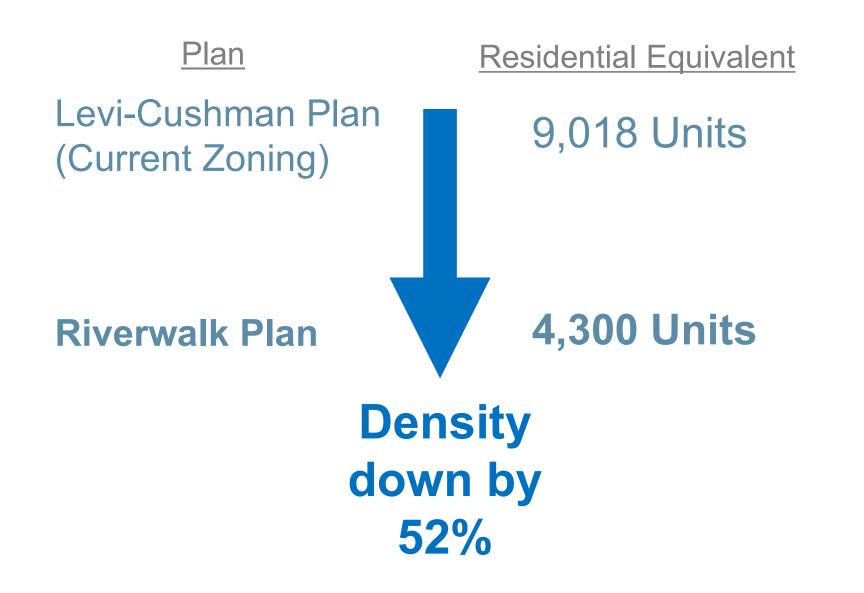

Mission Greens Vehicle Exit

- Capped building height at 5 stories
- Added additional setbacks

Comparison Then to Now

What is CEQA

California Environmental Quality Act

- <u>**Disclose**</u> to the public the significant environmental effects of a proposed discretionary project, through the preparation of an Environmental Impact Report (EIR).
- <u>**Prevent**</u> or minimize damage to the environment through development of project alternatives, mitigation measures, and mitigation monitoring.
- <u>Enhance</u> public participation in the environmental review process through scoping meetings, public notice, public review, hearings, and the judicial process.
- <u>Improve</u> interagency coordination through early consultations, scoping meetings, notices of preparation, and State Clearinghouse review.

What is an EIR

- Environmental Impact Report

 "the heart of CEQA"
- Analyze and inform the public of a project's environmental impacts
- Propose mitigations to alleviate impacts
- Identify alternatives that avoid or reduce impacts

EIR Areas of Analysis

- 1. Land Use
- 2. Transportation & Circulation 10. Tribal Cultural Resources
- 3. Visual Effects & Neighborhood Character
- 4. Biological Resources
- 5. Air Quality
- 6. Historical Resources
- 7. Energy
- 8. Noise

9. Greenhouse Gas Emissions **11. Geologic Conditions** 12. Hydrology **13.** Public Utilities 14. Water Quality 15. Public Services & Facilities 16. Health and Safety

Less than Significant Impacts

- 1. Land Use
- 2. Transportation & Circulation
- 3. <u>Visual Effects &</u> <u>Neighborhood Character</u>
- 4. Biological Resources
- 5. Air Quality
- 6. Historical Resources
- 7. Energy
- 8. Noise

9. Greenhouse Gas Emissions **10. Tribal Cultural Resources** 11. Geologic Conditions 12. Hydrology 13. Public Utilities 14. Water Quality **15. Public Services & Facilities** 16. Health and Safety

Riverwalk EIR

Less than Significant Impacts with Mitigation

- 1. Land Use
- 2. Transportation & Circulation
- 3. <u>Visual Effects &</u> <u>Neighborhood Character</u>
- 4. Biological Resources
- 5. Air Quality
- 6. <u>Historical Resources</u>
- 7. Energy
- 8. Noise

- 9. Greenhouse Gas Emissions
- 10. Tribal Cultural Resources
- 11. Geologic Conditions
- 12. Hydrology
- 13. Public Utilities
- 14. Water Quality
- 15. Public Services & Facilities

11

16. Health and Safety

Riverwalk EIR

Air Quality – Operational (Cumulative)

The only significant unmitigated impact associated with the project. It is the result of future residents' vehicle emissions.

Project is implementing traffic reducing features:

- Construction of a new transit stop
- Construction of bike & pedestrian facilities
- Transit passes
- Shuttle service

We have also identified project alternatives that eliminate this impact.

Transportation & Circulation

No significant impacts

Traffic analyzed using Vehicle Miles Travelled (VMT)

By law every project approved after July 1, 2020 must use VMT. Law states, if a project results in VMT that is at least 15% below the 'Regional Baseline', the project is determined to have no significant transportation impact.

TABLE 6–1 PROJECT VMT FINDINGS		alt -	
Regional Baseline (miles)	Significance Threshold (85% of Regional Baseline (miles)	Riverwalk Project VMT (miles)	Transportation Impact? (Over Threshold)
17.6	14.96	9.9 - 44%	RWAL NO
25.9	22.01	19.57 - 25%	No
	PROJE Regional Baseline (miles) 17.6	PROJECT VMT FINDINGS Regional Baseline (miles) Significance Threshold (85% of Regional Baseline (miles) 17.6 14.96	PROJECT VMT FINDINGSRegional Baseline (miles)Significance Threshold (85% of Regional Baseline (miles)Riverwalk Project VMT (miles)17.614.969.9 - 44%

Visual Effects & Neighborhood Character **RIVERWALK**

No significant impacts

Buildings north of Trolley tracks capped at 7 stories

Those adjacent to Mission Greens & Courtyards capped at 5 stories

Additional setbacks required for buildings along these shared edges

Hydrology (Flooding)

No significant impacts

Meeting or exceeding our 'no-rise' requirement

After construction, as-built elevations are verified to ensure 'no-rise'

Studies show decrease in water levels around the project

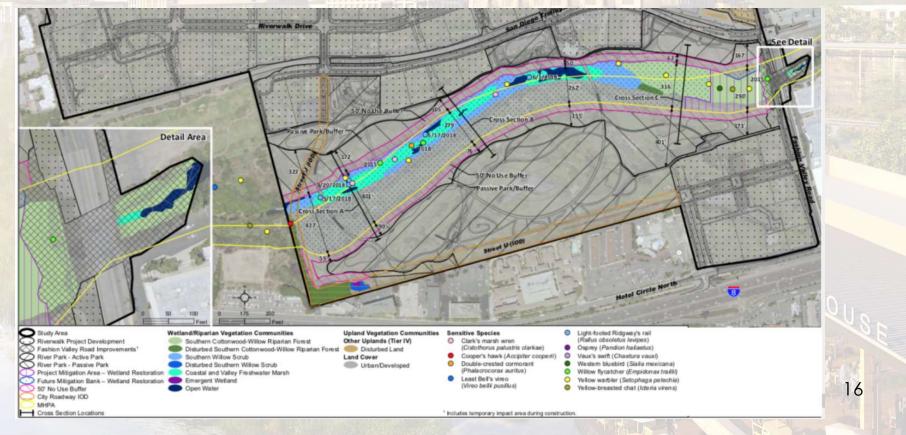

Biology/Noise

Significant Impacts to Jurisdictional Waters & Indirect Impacts to Sensitive Wildlife Species – Fully Mitigated

Impacts to wetlands due to Fashion Valley Road Improvements

Indirect construction & operational noise impacts

Biology/Noise

17

Potential Significant Impacts to Tribal Cultural Resources – Fully Mitigated

Per AB52, City consulted with Kumeyaay representatives regarding cultural sites

Mitigation Measures:

- We will monitor all digging on site for tribal cultural resources
 - Any significant artifacts that are found will be handled in coordination with tribes
- Providing a River Park plant palette that includes historically significant plants
- Identification signs along the River Trail to identify plants and their historical use
- The South District will include Kumeyaay street names

Cumulative Impacts

As required by CEQA, Riverwalk's EIR analyzes cumulative impacts whenever these impacts have the potential to combine with related impacts from other projects.

Our cumulative impacts analysis includes the recently adopted Mission Valley Community Plan and the Morena Corridor Specific Plan.

- Land Use
- Transportation & Circulation
- Visual Effects & Neighborhood Character
- Biological Resources
- Air Quality (Operational)
- Historical Resources
- Energy
- Noise

- Greenhouse Gas Emissions
- Tribal Cultural Resources

RIVERWALK

- Geologic Conditions
- Hydrology
- Public Utilities
- Water Quality
- Public Services & Facilities
- Health and Safety

Alternatives Considered

- 1) No Project, No Build
- 2) Considered but Rejected: Existing Levi-Cushman Plan, No Fashion Valley Road Improvements
- 3) Reduced Development Intensity Operational Air Quality Impact Avoidance

Land Use	Proposed Project	Alternative
Residential	4,300 units	2,275 units
Retail	152,000 square feet	106,000 square feet
Office	1,000,000 square feet	700,000 square feet
Park, Open Space, and Trails	Approximately 97 acres	No Change

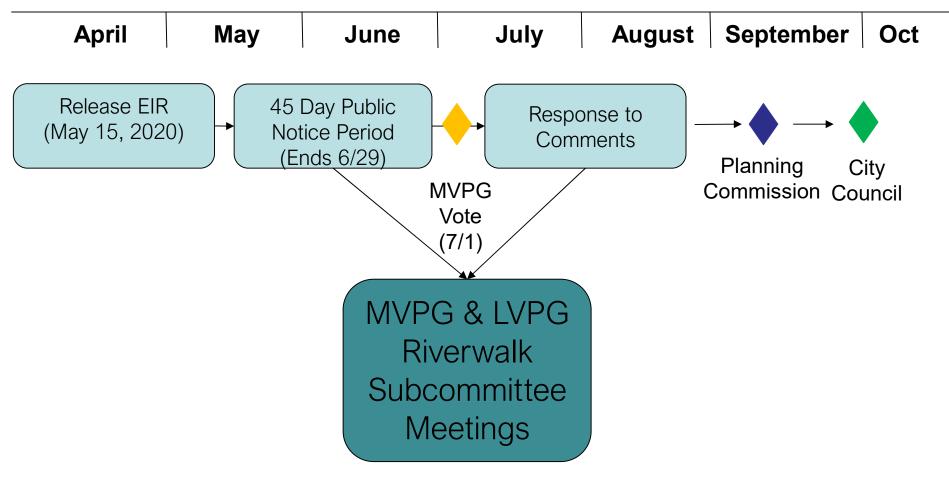

4) Reduced Development Intensity – Operational Air Quality Impact Avoidance and Minimized Historical/Tribal Cultural Resources Impacts

Land Use	Proposed Project	Alternative
Residential	4,300 units	2,200 units
Retail Space	152,000 square feet	40,000 square feet
Office	1,000,000 square feet	900,000 square feet
Park, Open Space, and Trails	Approximately 97 acres	Approximately 114 acres

What Happens Next?
